Exchange Worldwide*

eurex

Eurex – The Leading Futures and Options Exchange Worldwide

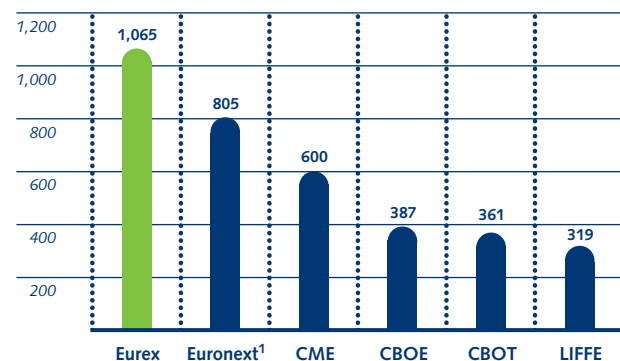

Eurex is the world's leading futures and options market for European derivative instruments. Its electronic trading platform provides access to a broad range of international benchmark products. Trading volume on Eurex exceeded 1,065 million contracts in 2004, an increase of over 50 million contracts compared to 2003.

Products

Eurex offers a full range of interest rate, equity index, stock option, and EXTF derivatives. The interest rate derivatives cover the German yield curve from one day to 30 years and the Swiss yield curve from eight to 13 years. Out of this segment, the Euro-Bund Future is Eurex's product with the highest volume at nearly one million contracts per day. Eurex's equity index products include futures and options on leading blue chip indexes such as the Dow Jones EURO STOXXSM 50 Index, the blue chip index DAX[®] of Deutsche Börse AG and the Swiss index SMI[®]. Eurex also offers a variety of market sector index derivatives based on the Dow Jones STOXX 600SM and Dow Jones EURO STOXXSM Sector Indexes. In the stock option segment, investors can choose between options on Dutch, Scandinavian, French, German, Italian, Swiss, and US stocks, including options on global stocks like AXA, DaimlerChrysler, Microsoft, Nokia, and Royal Dutch.

In addition, Eurex offers Futures and Options on Exchange Traded Funds[®] which are ideal products to enter the derivatives market especially for private investors.

Volume Comparison with other Derivatives Exchanges in 2004 (Traded Contracts in Millions)

Price Discovery

The Eurex market model is order driven and all quotes (defined as two sided orders) entered by Market Makers are matched using the same principle as the orders entered by non market makers. Fixed income, equity index, stock option and EXTF derivatives traded on Eurex are matched using the price/time priority principle. Orders in these products are sorted by price and entry time with market orders having the highest priority. Money market derivatives such as Three-Month EURIBOR Futures are matched according to the pro rata matching principle.

This algorithm allows orders to be matched regardless of their time stamp. Incoming orders are executed in proportion to their size and the available orders in the book.

Price information on all Eurex products is available on the Eurex website www.eurexchange.com. Market depth information is also disseminated to product users by numerous international price information vendors.

Access

Eurex offers both direct participation as a member firm of the exchange, and indirect participation as a customer of a member. Direct participation is possible by becoming a **General Clearing Member (GCM)**, **Direct Clearing Member (DCM)**, or a **Non Clearing Member (NCM)** at Eurex. The difference between these memberships is their role in the clearing process.

There is no fee for becoming an NCM. Members are billed for their technical connection according to their access type, in addition to a quarterly minimum transaction fee. Eurex members' terminals are linked via dedicated lines and/or internet technology to access points located in cities in Europe and the U.S. These access points are directly connected to the Eurex host computer in Frankfurt.

Indirect participation is possible by becoming a customer of one of the over 400 Eurex members. Access can take the form of traditional brokerage services as well as automated order routing. A list of members and their brokerage services as well as general information about Eurex can be found on the Eurex website www.eurexchange.com.

All published data as of the end of December 2004.

Neither Eurex Frankfurt AG (Eurex), nor its servants nor agents, is responsible for any errors or omissions contained in this publication which is published for information only and shall not constitute an investment advice. Any information herein is not intended for solicitation purposes but only for the use of general information. Eurex offers services directly to members of the Eurex market. Those wishing to trade in any products available on the Eurex market or to offer and sell any such products to others should consider both their legal and regulatory position in the relevant jurisdiction and the risks associated with such products before doing so. In particular, only CFTC-approved contracts are currently available for offer or sale to United States persons. The Dow Jones STOXX Indexes and related trademarks are proprietary to STOXX Ltd. and/or Dow Jones & Company, Inc. and have been licensed by Eurex Frankfurt AG. The derivatives based on these indexes are not sponsored, endorsed or sold by STOXX Ltd. or Dow Jones & Company, Inc. and neither party makes any representation about the advisability of investing in them.
